WIFI2_UBIFS_MPF Method

General Description and Name

Multiple partitions style BBM.
One or more partitions are using UBIFS file system.
UBIFS file system formats every block with EC header.

Relevant User Options

Bad Block Handling Type =   "WIFI2_UBIFS_MPF"

Spare area :   *"Enabled"*   Please refer to
"Description of common NAND special features.pdf". *Normally set as "Enabled" for this BBM.* [Default 'Disabled']

Special Notes

Partition information and flag of UBIFS includes in image header.
And UBI header also includes in image file header.

The other partitions are controlled like multiple partitions skip bad block.
But in the UBI partitions, it has to write EC header in every blank blocks in that partitions.
